Alan Derber

Mandex Motion Displays

Dear Alan,

I wanted to thank you for helping us create the new addition to our *Terminator 2:3D* attraction with your LED 330c displays. We realize that we were asking the displays to do something that they don't normally do, but, with your help, we were able to create LED displays that "talk" to the guests and create an interactive experience. Everyone who sees the displays loves them

Of course, we have had great luck with your displays in the past, so it was no surprise that this one came together so well. The displays that you provided for the Millenium Party as well as our *Mummy Returns Haunted Maze* have all been a success. We appreciate the level of personal commitment and technical support that you provide.

Best of luck to you in the future.

Sincerely,

Drew Campbell/ Technical Manager
Universal Studios Hollywood
