LEDit-Flex™ Lightweight flexible creative tough RGB LEDit-Flex™ Tiles and enclosures can be round, serpentine, straight, horseshoe, vertical, and make perfectly gapless smooth right angled corners, create concave, convex, shapes

Magnets on the Rear

or Velcro

**LEDIT-Flex™ can be sold or rented n creative kit form ready** for your own structure, with custom set-up, diagram supplied. Also, our LEDIT-Flex™ complete ticker screens, whatever option you choose our Ticker screens will arrive “plug and play” on your PC or laptop screen. depending on the controller that chosen best for your content requirements.

LEDIT-flex™ Tiles will adhere to most flat, straight or curved structures, offering a sleek 1.25” 1.5” ticker depth which will come with custom, easy- install instructions, it can also be ordered with complete fabricated extendable ticker enclosures in Black Powder coated, lightweight aluminum for linear tickers, or formed black polycarbonate for flexible bendable enclosures. Both offer front-frameless screens, adding a sleek modern look to your ticker.

- **LEDli-Flex™ Ticker Enclosures**, for straight tickers are in approx. 50.3” wide sections, or any custom length or height. At 6.25” high, or 12.59” wide or according to the tiles length, the tiles are designed to offer extendable height or length, enclosures are same as our tiles @ 12.59” wide and only 3.75”- 4” deep.

2 LEDit Flex Tiles 1 PPD sealed RibBon cables

Aluminum Enclosure

Nova Sending Box controller 1 Pc

- **Hardware LEDit-Flex Tickers come with options of a HDMI controller** synchronous controller which plugs into your HDMI laptop or PC output, which then can go up to 300’ using a Ethernet cat 5 cable to the PPD( Power data boxes), receiving cards ) inside the Ticker, Synchronous controllers the pc has to stay on.
- Mandex designed small and lightweight PPD’s which fit inside our enclosures or hide behind the tiles when you use your own structures these come with safe plug in cables that hook up in minutes no tools required .

**Options of networking asynchronous controller which** sends the data messages to the display from the the computer which can be shut down after sending the finished program file to the Ticker, WiFi is also an option and now depending on the controller and you can program from your android phone .

**HDMI or synchronous control systems use “HDMI ” out of your PC. acts as a 2<sup>nd</sup> pc screen, mapped and configured by the software to the size of your tickers pixel type and configuration.** The LED sign mirrors exactly what you design on your PC allowing for all types of content to be shown, including background colors and graphic scenes, with text messages going over the top or behind , video clips with cloud scenes using our editing software provided. Our Software runs RSS feeds, PowerPoint presentations, video clips, gifs in a variety of formats, scrolling text, with message scheduling features to automatically play your list of content. Using a remote pc you can program from anywhere.

- **Basic software Training** is included, with videos, written instructions, and diagrams.
- **Software supplied will allow you** set up a play list and schedule files in any date, hour, minute format. You can import and show word documents, scrolling text messages, images, jpgs, video clips in many formats or RSS feeds.
- **Tech support is always a phone call away** during your set-up, even after-hours. If you need us, we will be with you.
- **Maintenance with a spares kit** Ledit-Flex Screens could not be easier to use. No electricians or tools are required. A quick call and tech support will explain how to repair or replace in a minutes using the magnets or Velcro. No dark time while repairs or exchanges or repairs are being made.
- **Hanging hardware**, supplied for straight or flexible screens, with enclosures offer rear mount cleat and rail (these hang like pictures) or they can hang from the ceiling, using eye bolts supplied.

- **Curved Enclosures** , flexible Mandex Custom Rack enclosures which bend where you need it are also available, depending on the type of project and installation. These come in fomed plastic with cut out supports which allow you to flex bend to any curved structure.
- **Optionally , working with “Trussworks,”** we have designed our LEDitFlex to clip the magnets right on to Truss Works Ezy6 metal Truss system to make any strong permanent or rental shape structure for the Ticker.
- **Ticker Content: and benefits with a 48 high pixel pitch offers 1-line or 2-line, split screen scrolling** for financial stock quotes, news, sports, or advertising with messaging capability our software allows you the option of using a single line of text/video/animation/graphic, or use 2 lines combining your own text that enables you to be creative, artistic, and most of all empowers you to deliver powerful advertising, or informative messages on one line while up to the minute news or financial or sports ticker on the other line.

### For broadcast licensed stock quotes or sports results or news .

**Our content partner can offer TickerTainment™ “Eye-Candy”** offers news, sports, financial content, stocks, RSS feeds, along with your own messages. For example, if you don’t want to spend the time learning the program or you want someone else to do your programming and you want to run RSS feeds, web site contents, or show company Twitter feeds, our partner can do it all for you, for a reasonable monthly/yearly subscription. Or purchase the software. **Our Content Partner uses remote programming** and can have you up-and-running in minutes using WIFI, while still being able to maintain full-control using their software services. Eye Candy is a great service and is being used around the world by many international businesses.
